Active travel strategy objectives

1. Embrace a clear deliverable vision for a high quality, safe and connected active travel network across Cambridgeshire that will enable and encourage journeys currently being made by car to be taken by foot or cycle. This will support achieving Net Zero Carbon by 2045, and a healthier, more active Cambridgeshire.
2. Focus on shorter local journeys, as well as capturing the increased potential for longer journeys to be taken by active or sustainable travel modes alongside e-bikes and public transport. An integrated network will better connect both urban and rural communities to local facilities, improving social inclusion, physical and mental health, and wellbeing.
3. Deliver significant step-change in active travel provision across the county, by improving internal processes and collaborative working with key partners and developers. We will ensure safe active travel is embedded and prioritised in all future decision-making, projects, schemes, and policies at all levels.
4. Ensure the existing and future Active Travel network is fit for purpose by;
 - A. Ensuring active travel is planned as part of all transport schemes and developments at the outset; and
 - B. Exploring new ways to prioritise maintenance of existing active travel infrastructure, addressing the importance that well maintained routes have on sustained use; and
 - C. Embedding a 'whole life cycle' approach to scheme development, ensuring all new schemes are designed and funded to minimise the ongoing maintenance cost.
5. Explore new ways to promote and encourage active travel and support initiatives that create behaviour change and modal shift to active travel modes, including the issue of 'knowing what's out there'. Look holistically at the shared experience and influences that make walking or cycling an attractive option as a form of travel.
