

The Climate Change Mitigation Advisory Group

The Climate Change Mitigation Advisory Group has successfully secured the purchase of 2 electric water pumps, for the expressed use for emergency flood situations within Buckden.

These pumps are currently on loan to vulnerable residents in High Street North, who have signed for the receipt of the pumps and their responsible use. Until such time that the flooding risk subsides, or the council requests their return.

The thermal imaging camera continues to impress and there is now a short list of people waiting to use it.

Regards Allan Jones.
Buckden Parish Coucillor
Climate Change Mitigation Advisory Group.
